← Towed Can

Before proceeding please make sure the main can is securely attached to the garbage hook using the PTO or ball hold down.

Step 1

Hook the Can Coupler to the main can's lower lift bar. In most cases Can Couple's can remain in place on either the lift bar or the second cans handle. Use one PTO to secure cans lift bar to the Can Coupler

Step 2

Attach the handle of second can being towed and use one PTO clip to secure the handle to the Coupler.

Note: Heavier can should be the main can, and the lighter one the tow can.

Thank you for your order, as a small company we truly appreciate your business!
